

How Important Are Your Eyes?

Ask these 4 Questions Before Going Outside This Summer...

1. Did you know that cataracts and retinal damage occur slowly after years of unprotected sun exposure?
2. Are your sunglasses polarized so you can see the kids clearly when they're playing in the water?
3. Does everyone in your family have good quality sunglasses and a hat?
4. Did you know that babies & toddlers can be fit with easy to wear sun protection?
